e-Planning deals with the revolution of new IC technologies and their deep & wide impacts

***Democracy cannot extend beyond the reach of a man's voice***

(Plato, Walter Wriston)

***Who will serve (the state) as its herald unless he has the lungs of a Stentor?***

(Aristotle, Polit., VII, 1326 b, 7-11)

***an emerging transdisciplinary field***

## • The Vision

Information Technology	Features / Attributes	Decision Models
Voice	<ul style="list-style-type: none"> <li>• from "few" to "few"</li> <li>• limited reach</li> </ul>	<u>Direct Democracy</u>
Manuscript	<ul style="list-style-type: none"> <li>• without auxiliary processing</li> <li>• cheap, potentially universal access (low cost to enter the market)</li> <li>• low control / regulatory costs</li> </ul>	Heterogeneous Empires
Press	<ul style="list-style-type: none"> <li>• from "few" to "many"</li> <li>• non-limited reach</li> </ul>	<u>Representative Democracy</u>
Radio	<ul style="list-style-type: none"> <li>• with processing in source</li> </ul>	Homogeneous Dictatorships
TV	<ul style="list-style-type: none"> <li>• expensive, restricted access (high cost to enter the market)</li> <li>• average control / regulatory costs</li> </ul>	
Satellite network	<ul style="list-style-type: none"> <li>• from "many" to "many"</li> <li>• non-limited reach</li> </ul>	<u>Participatory Democracy</u>
Fiber optics net	<ul style="list-style-type: none"> <li>• with processing in source and destination</li> </ul>	Technocrat Dictatorships
μcomputer	<ul style="list-style-type: none"> <li>• moderate access cost, potentially universal (low cost to enter the market)</li> </ul>	
Internet	<ul style="list-style-type: none"> <li>• high control / regulatory costs</li> </ul>	

e-Planning deals with the revolution of new IC technologies and their deep & wide impacts

*Shifting paradigms...*

- From
  - centralized broadcast dissemination (e.g. TV, Radio)
  - "bigger is better" in computing power (e.g. mainframes)
- To
  - decentralized network interaction (e.g. internet, web)
  - "small & ubiquitous" in computing power (e.g. pc, smart phones)

*.. impact everywhere...*

economy, finances, business models,  
environment-health, safety, wars,  
learning, education, arts, institutions,  
regulation, participation, **power**

*... and require deep new  
knowledge on both  
Technology and Society*

*an emerging transdisciplinary field*

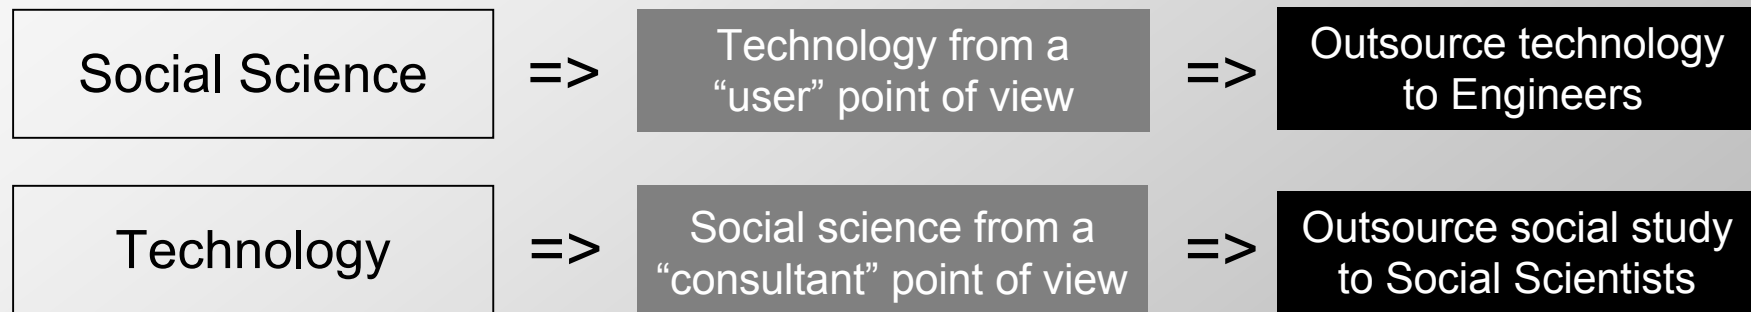

## • The Vision

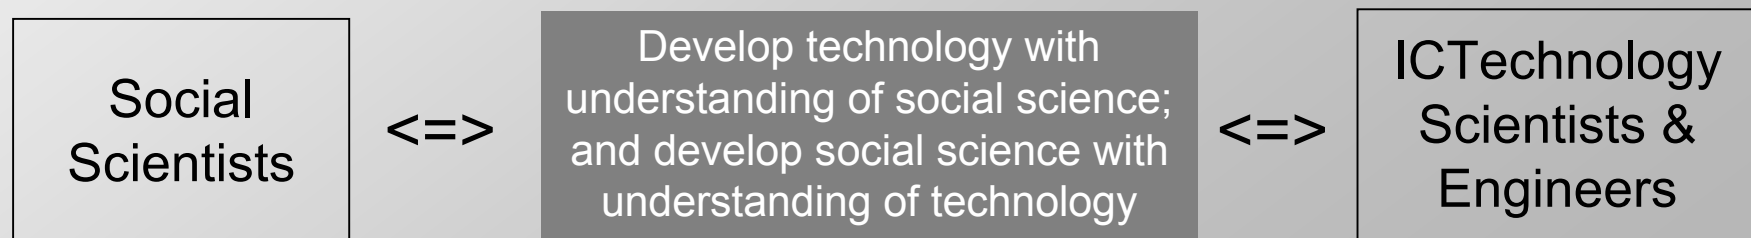

**e-Planning** embodies a new paradigm  
of Technology with Social Sciences

*Going past the traditional “blackbox” disciplinary approach...*

*... the new **e-Planning** synoptical transdisciplinary approach:*

## • The Vision

**e-Planning** sets a transdisciplinary research agenda of Technology with Social Sciences

### Mission:

To **research**, but also develop, prototype, test and transfer, information and communication technologies (**ICT**) in the **planning** context, together with the study of ICT related social needs and of its impacts in society; based on transdisciplinarity (Engineering, “Hard” & Social Sciences, and Humanities):

- Develop and transfer ICT at the service of public interest and driven by it;
- Research ICT impacts and ICT diffusion processes in planning;
- Build capacity with sustainable ICT developments & Institutions;
- Breed networked entrepreneurship as well as social capital.

## • The Vision

e-Planning agenda targets ICT  
in support of society and citizens

### Objectives:

We seek new ICT with social frameworks that:

#### - ***Link Academia with Society***

Society incorporates business, but also public administration, civil society and individual citizens. We focus on good e-government and e-governance, but also good e-NGOs; on e-cities and e-regions that innovate but are inclusive; on ICT that foster social networks empowering both communities and individuals.

#### - ***Fill-in for market failures***

ICT developed in Academia must be attuned to market dynamics, but must specially be responsive to social needs. This requires excellence in both ICT and social sciences / humanities.

#### - ***Optimize Social Capital*** returns, besides enabling scaled entrepreneurship.

We approach ICT-based entrepreneurship as an extension of citizenship in the era of ICT social networks, enabling self-reliance & choice of alternative social-economic paths.

## • The Vision

e-Planning Agenda was created as part of an e-Planning Consortium, open to society

### Consortium:

The strategic approach includes an *e-Planning Consortium* open to society, at international level, with initial anchors in the community of Portuguese speaking countries (CPLP), in Europe (EU) and at MIT (USA). This Consortium, led by academic institutions, is a collaborative platform for *research and action* on the *e-Planning agenda*.

- Academic Institutions (teaching, research and knowledge transfer)
- Business enterprises, Cooperatives and Associations for economic activities
- Public Administration and Government at local, national, regional & multi-national levels
- Non-Governmental Organizations, Non-Profit Associations and Civil society institutions

[www.e-planning.org](http://www.e-planning.org)

## • The Vision

e-Planning Lab is structured as a  
Network of *Living Laboratories*

### Approach:

Given the challenges of transdisciplinarity, engaging bodies of knowledge so diverse, from different areas in social and “hard” sciences to engineering, the best approach is to allow multiple centers with complementing focus and overlapping know-how, collaborating as a *live network*, linked by common goals.

The concept of *Living Laboratories*,  
is particularly adequate for such  
**Network of LabTec TS**

Therefore, each Academic Research  
Center can contribute with its own flavour  
of an **ePlanning LabTec TS Campus**.

## • The Vision

One "core" e-Planning Lab Campus needs resources to make a very special contribute

### Approach:

While the strategic approach envisions multiple campus of e-Planning Labs collaborating as a *live network*, linked by common goals, in the current stage it is essential to have one **main campus**, to foster the network, acting as facilitator, support and reference Lab.

The concept of *Living Laboratories*, is particularly adequate for such **Network of LabTec TS**

Each Academic Research Center can contribute with its own flavour of an **ePlanning LabTec TS Campus**.

On early stages, it is vital to be able to count with one **ePlanning LabTec TS Core Campus**.

## • The Vision

e-Planning Lab Core Campus as a special unit for knowledge and technology transfer

### Core Campus:

An **e-Planning Lab Core Campus** must gather critical resources to act as a special Unit of Knowledge & Technology Transfer, building directly on:

- *Specific scientific & technology capacity and strenghts;*
- *Core membership in the **e-Planning Consortium**, and anchor of Joint Programs;*
- *Key role in building an **e-Planning Center**, as cross-cut entity transversal to Departments and Universities, in line with the future transdisciplinary “Colleges”;*
- *Strategic partnership with international research centers such as CITIDEP;*
- *Strategic partnership with top-notch world class Universities, such as MIT.*

e-Planning Consortium

## • The Foundations

e-Planning Agenda, was created at MIT

Professor Ferreira (**Joseph Ferreira Jr.**) was the founding director of the Planning Department's Computer Resource Lab and is now head of Urban Information Systems. He teaches analytical methods and computer-based modeling for planning and urban management including courses involving extensive use of geographic information systems (GIS) and database management. Both Prof. Ferreira's undergraduate degree (in electrical engineering) and his PhD degree (in operations research) are from MIT. His research uses GIS and interactive spatial analysis tools to model land use, transportation, and environmental interactions and to build sustainable information infrastructures for supporting urban and regional planning. He is a past-president of the Urban and Regional Information Systems Association (URISA) and has been principal investigator of numerous research projects studying job-housing balance, urban performance measures, and urban information infrastructure. His current research includes the Future Urban Mobility project within the Singapore/MIT Alliance for Research and Technology where he is the SMART Research Professor of Urban Information Systems."

## • The Foundations

e-Planning Agenda, was created at MIT

e-Planning Seminar, MIT course, by Prof. P. Ferraz de Abreu, 2003

## • The Foundations

*e-Planning Lab* was born as part of the e-Planning Agenda, created at MIT

**Session topics:** (A- Breadth)

### 1) Community level: **e-Community Planning**

- Neighborhood Information Systems
- Community Statistical Systems
- e-Neighborhoods
- Community Empowerment

### 2) City level: **Enhancing City Performance**

- City Knowledge and Meta-Knowledge
- Measuring and Monitoring City Activity and Performance
- Learning about Cities through IT
- The IT infrastructure for City-level e-Government / e-Planning

### 3) Global level: **The Fading Borders between Regional, National and Local Planning**

- e-Government and e-Planning: new inter-dependencies between national, regional and local plans
- e-social movements and multi-level impacts
- Informal governance and challenges to land-based sovereignty

e-Planning Seminar, MIT course, by Prof. P. Ferraz de Abreu, 2003

**Session topics: (B- Issues)**

## • The Foundations

***e-Planning Lab*** was born as part of the e-Planning Agenda, created at MIT

### 1) Public Participation

- Technologies of Communication for citizen empowerment
- Technologies of Knowledge for responsible citizen participation
- New citizen responsibility with de-regulation
- New role of the planner in governance

### 2) Privacy, Security and freedoms in the e-World

- Planning, IT and the trade-off between security and freedom
- e-data vulnerability and free flow of information
- New e-manipulation and metadata standards
- Location-based services and data access: (Big-brother vs. efficient monitoring)
- Preserving individual rights (free circulation of information vs. protection from bad uses of that information, safety in travel and accessing city space vs. citizen mobility, privacy in communications - Internet, voice, etc.).

### 3) Urban Modeling and Urban Design

- The implications of transparent models and increasingly 'sensed urban spaces
- The changing economics of place
- Who benefits from GIS and spatial analysis
- The geography of change in the e-World
- New spatial relationships (e.g., e-abutters)
- Facilitating the sharing of planning models and data

### 4) Environmental Planning

- Citizen participation in Environmental Impact Analysis
- Kyoto and transportation planning
- The impacts of EnviroMapper as a public information strategy
- Spatial analysis and environmental justice

### 5) Institutional Reform

- the emergence of new frameworks with real impact in planning and governance, both formal and informal.
- Planning in the knowledge-based society
- e-Accountability
- Shifts of decision centers in e-Government
- IT challenges to hierarchy paradigms in public administration

e-Planning Seminar, MIT course, by Prof. P. Ferraz de Abreu, 2003

## • The Foundations

*e-Planning Lab* was born as part of the e-Planning Agenda, created at MIT

Intersecting the *e-Planning Seminar*. CITIDEP and MIT organized ICPPIT03. Off-conference networking meetings led to a Living Labs concept and to an informal LabTec TS Network Task Force

ePlanning proponents: Pedro Ferraz de Abreu & Joseph Ferreira Jr.

## • The Foundations

## • The Foundations

CITIDEP promoted the MIT-Portugal e-Planning Consortium Task Force

### e-Planning Task Force:

created in 2005

- MIT-DUSP

Joseph Ferreira Jr  
Pedro Ferraz de Abreu

- CITIDEP

Pedro Ferraz de Abreu  
João Joanaz de Melo

- FC-UL

José Manuel Pinto Paixão

- FCT-UNL

João Joanaz de Melo

- ICS-UL

Luisa Schmidt  
Tiago Saraiva

- CSJP-UA

Eduardo Anselmo de Castro  
Maria João Antunes

• Following up the first e-Planning Seminar at MIT (2003), and the “interest groups” emerging from the ICPPIT03 Conference at MIT (MIT-CITIDEP), it was created in 2005 an informal task force to bring e-Planning into the MIT-Portugal Program.

This task force had regular meetings at ICAT - FC-UL Campus. Besides both Deans (J.M. Pinto Paixão, N. Guimarães), more than a dozen other faculty and researchers attended meetings (CITIDEP, MIT, CSJP-UA, DeCA-UA, ICS-UL, FCT-UNL, FE-UC, IPVC-ESE, FLAD, FA-UTL).

In Portugal, e-Planning was thus born also around the same core MIT & CITIDEP team.

• It was notorious that MIT - DUSP faculty were very interested in this initiative, and attended many meetings in Portugal. The discussion was very thorough, since we were aware of the difficulties of bringing together a transdisciplinary agenda. The debate was a powerful source of inspiration with the team often taking photos of the blackboard, where piece by piece a consistent and comprehensive agenda was taking shape.

• In April 2006, Pedro Ferraz de Abreu distributed a memorandum where the e-Planning Consortium and agenda was first formally proposed, and accepted, both at MIT and in Portugal, and task force members became formal representatives of their Institutions.

## • The Foundations

CITIDEP promoted the MIT-Portugal e-Planning Consortium Task Force

Nuno Guimarães
- FCT-UNL  
Fernando Santana
- ICS-UL  
Villaverde Cabral
- CSJP-UA  
Helena Nazaré
- ISCSP-UTL  
João Bilhim

### Proposal 2006 (Institutional)

### Subscribed Goals:

- 1 – A **Portuguese e-Planning Center**, as a Focal Point of Excellence, based on a multidisciplinary ‘Consortium’ within Portuguese Academia, with strong participation of related entities from public and private sectors and civil society;
- 2 – A strategic institutional relationship with USA Centers of Excellence on e-Planning, such as M.I.T.;
- 3 – A **European Research Network for e-Planning**, as a Network of Excellence (NOE), evolving to an *Institute for e-Planning*, within the framework of the EU Joint Research Centre, with possible headquarters in Portugal.

One key transversal component of the Program on e-Planning will be a **Laboratory of Technology & Society**, based on a **network of Labs**, which may require setting-up new facilities but mostly adapting and requalifying existing resources.

In “*Towards e-Planning as part of MIT-Portugal, MIT-Portugal/e-Planning Task Force*”

## • The Foundations

MIT report suggested **e-Planning** to be considered for the MIT-Portugal Program

From: Lawrence Vale <ljvale@MIT.EDU>  
Subject: Re: Urgent-Towards e-Planning as part of MIT-Portugal  
Date: Wed, 17 May 2006 22:40:08 -0400  
To: Pedro Ferraz de Abreu <pfa@mit.edu>  
Cc: Joseph Ferreira <jf@mit.edu>

Dear Pedro,

Many thanks for sending along your latest version of the proposal for collaboration between MIT/DUSP and various university programs in Lisbon on the topic of e-Planning and Urban Information Systems. I can confirm the strong interest of the MIT Department of Urban Studies in exploring the exciting dimensions for research and collaboration described in this document. Our joint efforts to link emerging information and communication technologies to initiatives to improve public administration and urban management seem particularly relevant to the challenges of enhancing economic performance and innovation in Portugal. I very much hope that this aspect of joint work can be included in the MIT-Portugal collaboration.

Yours sincerely,  
Larry Vale

### ASSESSMENT OF AN MIT-PORTUGAL COLLABORATION MASSACHUSETTS INSTITUTE OF TECHNOLOGY

FINAL REPORT  
AUGUST 29, 2006

CONDUCTED FEBRUARY 15 - JULY 15, 2006

PROGRAM DIRECTOR: DANIEL ROOS, PROFESSOR AND FOUNDING DIRECTOR, MIT  
ENGINEERING SYSTEMS DIVISION

Although we have received suggestions about many potential projects and focus areas, we mention "e-planning" initiatives in particular because we have received many expressions of interest from faculty in Portugal and MIT. We suggest that the "e-planning" initiatives should be the subject of further analyses during the coming year after the launching of the initial program.

# e-Planning

(e-Planning: Engineering with Hard & Social Sciences)

- The Vision
- The Foundations
- **The Laboratory**
- The Build-Up
- The Know-How
- The Team

e-Planning Consortium

## • The Laboratory

e-Planning Lab (LabTec TS) rationale  
is to support Research and Teaching

### Rationale:

*To provide an integrated environment for the cross-cut transdisciplinary action of the e-Planning community*

- support e-Planning curricula innovation & courses;
- support e-Planning joint research projects;
- host e-Planning pos-docs & visiting researchers, e-Planning students & grantees;
- support knowledge transfer initiatives, promote start-ups and community building.

e-Planning faculty & researchers are, and will stay, affiliated with different research units and depts.;  
The **e-Planning LabTec** will provide a needed federating infrastructure for cross-cut inter-  
- departmental, transdisciplinary work: joint research, teaching, curricular innovation, publishing.

[www.labtec-cs.net](http://www.labtec-cs.net)

## • The Laboratory

e-Planning Lab (LabTec TS) builds on  
UL(FA+FC), UNL(FCT) & CITIDEP skills

Product Targets: (seed proposal, in discussion)

[www.labtec-cs.net](http://www.labtec-cs.net)

### *Mobile Computing & Georeferenced Indicators for Planning*

#### Mobile e-Citizenship:

- environment
- health
- civic action

#### Mobile e-City:

- energy
- transportation
- autarcy

#### Scientific trends:

- *Measure the “Performance of a City”*

*(John DeMoncheaux, MIT)*

- *Local Indicators for Neighborhood Planning: Human Development (HDI) / Empowering Communities*

#### Methodology trends:

- Participatory Science & Spatial Analysis: *Gathering & modeling georeferenced bio-physics & socio-economic indicators, with citizen participation*

## • The Laboratory

e-Planning Lab (LabTec TS) strategy  
targets a wide family of lab products

### Product Family:

- **Research:** Projects, publications, events, lab measures
- **Teaching:** Curricula innovation, support to lab work in related courses; e-learning tools & support
- **Software/Hardware:** Prototyping, Patents, 'Utility Models' (pre-patent registration)
- **Training:** Transdisciplinary topics and methods niche; target decision-makers, policy-makers, opinion-makers, college & highschool teachers
- **Dissemination:** Research Journal, Newsletter, web sites, media content (including tablet-oriented)
- **Certification:** Certification entity or Reference Lab for Certification authorities; Guidelines;
- **Observatories:** Observatories on ICT Policy, Impacts, Advisory Reports; White papers
- **Auditing & Benchmarking:** ePlanning Projects, Institutional Analysis & Efficiency; City & Systems Performance
- **Service Provision:** Consultant Warehouse, Service Provision on innovation, User Needs Assessment, Monitoring; Policy Evaluation; Impact Assessment; Lab Equipment support; Net Services; Collaborative tools

[www.labtec-cs.net](http://www.labtec-cs.net)

## • The Laboratory

e-Planning Lab (LabTec TS) as a tool  
to empower and amplify existing programs

### Base Plan:

- Start-up with e-Planning Faculty & Researchers
  - currently teaching e-Planning related courses (Joint PhD)
  - interested researchers in labs related to e-Planning agenda
  - researchers within the International e-Planning Partner Network (MIT, Unicamp-Brasil, IFU-Paris, Dublin IT, CITIDEP, JRC-UE, etc.).
- Mobilize advanced students (Master & PhD)
  - incorporate thesis projects
  - integrate project tasks in e-Planning course work
  - host grants & fellowships
- Use seed funding:
  - to generate both high quality research & marketable (ex. patent) products
  - to build capacity and apply to EU & USA funding and other sources.
- Create a Socio-Economic Partner's Council (*Business, Public Admin., Municipalities, NGOs*)

## • The Laboratory

e-Planning Lab (LabTec TS) as a tool  
to empower and amplify existing programs

### Research Agenda:

*Starting point : Joint PhD Program (e-Planning Consortium)*

<b>e-Planning knowledge infrastructure</b>	<i>Mapping of the knowledge society. Mapping of the planning knowledge. Develop the new ICT infrastructures and strategic frameworks</i>
<b>e-Planning for the government of the future (e-government)</b>	<i>More efficient and responsive government, closer to citizens; better enabling role; better services; better adjustment to the challenge and new potential of digital implementation of administrative procedures, beyond raw automation; two-way G2G, G2C, G2B.</i>
<b>e-Planning for a new governance (e-governance)</b>	<i>Foster institutional culture towards the common good, more equity and less exclusion; build strategic institutional capacity within globalized world; better institutions; better regulation framework and handling of market failures; better balance of security &amp; efficiency vs. freedoms, liberty and accountability.</i>
<b>e-Planning for the city of the future (e-city) and territory</b>	<i>Build the cities of the future, as sustainable environments with new functionality that breed innovation; foster cities with better quality of life, more attractive and competitive; better spatial planning, promoting social and territorial cohesion, incorporating new structural impacts of ICTs.</i>
<b>e-Planning for a new citizenship (e-citizenship)</b>	<i>Enable a better informed and educated citizen, more participative, more critical, more responsible; better balance of technology challenges with ethics &amp; individual freedoms &amp; privacy.</i>

## • The Laboratory

e-Planning Lab (LabTec TS) as a tool  
to empower and amplify existing programs

### Research Lines & Projects: (seed)

*Starting point: Current PhD Thesis Projects*

#### 1. ICT and Inclusion, Literacy, Cooperation

- Sustainability factors in Digital Inclusion: the case of Digital Territories Project in Brasil
- New ICT in Portuguese speaking countries: Advantages from and for CPLP
- e-Literacy, schools & municipalities towards a common goal: e-citizenhip.

#### 2. Smart Cities, Cohesion & Participatory Systems

- Between urban and virtual walls: the influence of ICTs on divided cities. The case of Belfast
- Promoting Local Sustainability through Indicator-based awards: The case of ECO XXI Program
- Mobile Technologies as a Tool for Efficiency Gains in Support to Citizens in Emergencies
- Decision Support Tools in the Evaluation of Housing Market
- The impact of digital asymmetries in territorial cohesion: a new dimension of spatial planning

#### 3. Internet Governance, Open Data, Security & Privacy

- Compromise between free technology and privacy: a matter of technological literacy
- DDOS attacks and the new security framework challenges of the Era of "Hacking"
- TeleGeoProcessing Device Making the Mobile Technologies Useful in Real World Data Acquisition
- Patterns of Protection of Intellectual Property & Economic Development.

## • The Laboratory

e-Planning Lab (LabTec TS) is part of the Universities' refereed Research Units

### Group Productivity:

---

*Starting point inherited from LabTec CAPP-TSG 2010-2012*

Between 2007 and 2012, the core of LabTec e-Planning Team built a research cluster on “Technology, Society and Governance” (TSG), at invitation of the “Center for Administration and Public Policies” (CAPP), hosted by ISCSP-UTL.

Before TSG team joined, CAPP was ranked “Fair” by FCT-MCES. By the end of 2008, with a significant contribution from the TSG research cluster, CAPP was ranked “Excellent”.

By 2011, with 7 PhD researchers (out of a total of 111 PhD at CAPP), the TSG research cluster was among the most productive at CAPP, both in absolute and relative terms, on most metrics used by FCT-MCES in their review process. [from the 2012 report of CAPP Coordination & Presidency]

One of the greatest challenges faced by a multi-disciplinary research unit such as the e-Planning Lab (LabTec TS), is scientific evaluation. Referee Panels, both national and international, are always organized by specialized scientific domain. To which should we submit for e-Planning evaluation?

The (rare) qualification, for obtaining "top grade" (5 in 5) from juries with international referees, in multiple areas (such as 'Communication Sciences', 'Architecture, Urban planning & Design', 'Political Science', 'Geography') was demonstrated by the Lab team and its coordinator, Prof. Pedro Ferraz de Abreu.

# Ciência, Tecnologia e Inovação

De 22 a 24 Junho 2015, o Instituto Brasileiro de Informação em Ciência e Tecnologia (Ibict/MCTI) realiza em Brasília o **Workshop e-Planning Territórios Sustentáveis**.

O encontro busca levantar questões para adaptação à sociedade da informação e do conhecimento, com vistas à melhoria da qualidade de vida para todos com base nos progressos da ciência e da tecnologia. A ideia é identificar novos desafios para o Estado, a sociedade civil e as empresas privadas.

O workshop em Brasília aborda o **e-Planning** como ferramenta para abordar os conceitos interligados de sustentabilidade, participação pública, inclusão e coesão, na discussão de "cidades inteligentes". Segundo a organização, trata-se de uma nova área de investigação científica de natureza transdisciplinar, com foco na interação entre as tecnologias da informação e da comunicação (TICs) e o planejamento.

"A agenda e-Planning surgiu no MIT (Massachusetts Institute of Technology), e desenvolveu-se por via de um Consortium e-Planning, com forte participação de Portugal e agora do Brasil com o recente protocolo CITIDEP-IBICT, no quadro do Consortium e-Planning", explica a diretora do Instituto, Cecília Leite Oliveira. Segundo ela, a cooperação com o CITIDEP- Centro de Investigação de Tecnologias de Informação para uma Democracia Participativa, de Portugal – "abre o caminho para o aprofundamento na identificação e fundamentação de respostas a estas questões".

Um dos resultados esperados dos debates é a composição do **Livro Verde – Cidades do Futuro**, no âmbito dessa cooperação. O presidente da organização portuguesa, Pedro Ferraz de Abreu, estará presente.

e-Planning Consortium

## • The Know-How

e-Planning Lab Team built its know-how with the e-Planning community in 10 countries

[www.labtec-cs.net](http://www.labtec-cs.net)

The LabTec TS e-Planning team has a rich portfolio of research and action projects, since 1995, around a core group initially at MIT and CITIDEP, with a sequence of partnerships with research units at different Universities, within an informal e-Planning Consortium. Those projects, and corresponding research, were very different in size, social impact and research domain.

In this section, it is provided a few examples of the know-how acquired through some of these **projects and research lines** in the last 10 years.

### ENTER.HUB

Thematic Workshop 3. New Technologies - Smart Cities  
INTRODUCTION

Lugano, 20-21 February 2014

AN URBACT II PROJECT

Pedro Ferraz de Abreu

Connecting cities  
Building successes

### Why Smart City?

Beginning with transportation...

User Needs Assessment

What we need	What ICT can do for us
- move faster and safer, for less cost;	ICT for speed performance and engine efficiency, and safety management
- not waste time in poorly articulated inter-modal schedules;	ICT for better information on real-time schedules
- have more alternatives for each point-to-point travel;	ICT to locate nearest pool of cars, bykes, etc. but also to locate nearest public stop / station, according to destination
- not waste time buying tickets for each journey leg or transport mode;	ICT for integrated ticketing
- combine personal trasport with public system	ICT to locate parking, its vacancies and pricing, and automate payment
- make commuting time less wasteful	ICT in transient system (both stations and vectors) for tele-work, socializing, entertainment
- faster identification of public transportation system faillure and corresponding repair	ICT for monitoring but also ICT for citizen input and link it to standard procedures

Etc.

Thematic Workshop 3, New Technologies - Smart Cities. 20-21 February 2014

### ENTER. HUB - NEWSLETTER N° 5

## 10 x 2 Recommendations 10 on SMART TECHNOLOGIES AND CITIES .....

Thematic Expert, Pedro Ferraz De Abreu  
Workshop in Lugano, February 2014

<b>SMART ECONOMY</b> (Competitiveness) <ul style="list-style-type: none"> <li>Innovative spirit</li> <li>Entrepreneurship</li> <li>Economic image &amp; trademarks</li> <li>Productivity</li> <li>Flexibility of labour market</li> <li>International embeddedness</li> <li>Ability to transform</li> </ul>	<b>SMART PEOPLE</b> (Social and Human Capital) <ul style="list-style-type: none"> <li>Level of qualification</li> <li>Affinity to life long learning</li> <li>Social and ethnic plurality</li> <li>Flexibility</li> <li>Creativity</li> <li>Cosmopolitanism/Open-mindedness</li> <li>Participation in public life</li> </ul>
<b>SMART GOVERNANCE</b> (Participation) <ul style="list-style-type: none"> <li>Participation in decision-making</li> <li>Public and social services</li> <li>Transparent governance</li> <li>Political strategies &amp; perspectives</li> </ul>	<b>SMART MOBILITY</b> (Transport and ICT) <ul style="list-style-type: none"> <li>Local accessibility</li> <li>Inter-national accessibility</li> <li>Availability of ICT-infrastructure</li> <li>Sustainable, innovative and safe transport systems</li> </ul>
<b>SMART ENVIRONMENT</b> (Natural resources) <ul style="list-style-type: none"> <li>Attractivity of natural conditions</li> <li>Pollution</li> <li>Environmental protection</li> <li>Sustainable resource management</li> </ul>	<b>SMART LIVING</b> (Quality of life) <ul style="list-style-type: none"> <li>Cultural facilities</li> <li>Health conditions</li> <li>Individual safety</li> <li>Housing quality</li> <li>Education facilities</li> <li>Touristic attractivity</li> <li>Social cohesion</li> </ul>

... Framework for smart city indicators .....  
Ranking European Smart Cities, Centre of Regional Science, Vienna

### ... R1. Preserve citizens' security, identity and privacy

This is one of the great challenges of modern, ubiquitous ICT, and a serious requirement for any sustainable process.

### ... R2. Reduce inequality by universal access to technologies

Universal access implies adequate choice of technology and its deployment, comprehensive user-needs assessment, with a clear effort to consider special needs, such as low-income citizens and other situations.

### ... R3. Use ICT for accountability and transparency

Balanced agendas imply good governance control and auditing tools, but also tools to promote and secure a participatory process, open to all citizens/stakeholders.

### ... R4. Develop international cooperation for improving the regulatory framework

## • The Know-How

e-Planning Team wrote the recommendations for EU on "smart cities, ICT & participation"

[urbact.eu/en/projects/metropolitan-governance/enterhub/homepage/](http://urbact.eu/en/projects/metropolitan-governance/enterhub/homepage/)

ENTER. HUB - NEWSLETTER N° 5

### 10 x 2 Recommendations

### 10 on SMART TECHNOLOGIES AND CITIES .....

Thematic Expert, Pedro Ferraz De Abreu  
Workshop in Lugano, February 2014

#### regulatory framework

Besides mandatory cooperation to articulate institutions and regulations at local and national level, globalisation is a hard fact in major transport networks, which are the most important context of city hubs, such as ENTER.HUB.

#### ... R5. Promote open data standards as opposed to proprietary data and protocols

In many procurement areas in developed countries, it is a well-established practice to mandate for open standards, when public moneys are at stake. Experience shows this is a key factor to avoid the capture of public interest by private interests, in what concerns the smart city industry.

#### ... R6. Favour integrated, decentralized, distributed architectures for ICT systems

While centralized systems may in some cases allow for better integration, and be the most adequate, distributed systems

ENTER. HUB - NEWSLETTER N°

ENTER. HUB - NEWSLETTER N° 5

tend to be more flexible, easy to maintain and to engage users. Decentralized systems require, however, open data standards enforcement for real integration.

#### ... R7. Unify local and regional transport with a common ticketing system

Integrated ticketing systems ("one trip - one ticket") are at the core of any rational, integrated, multi-modal system. It also allows for true market-driven efficiencies, facilitating multiple operators without hindering the system. Such unified ticketing systems require tools that give responses to a query (origin-destination) structured for the citizen to use.

#### ... R8. Integrate ICT into a global urban strategy before hard investments

One potential good approach is to establish a "Smart City Officer" at the municipality.

#### ... R9. Promote territorial cohesion as the base for a true "smartness" in a city

When planning for smart infrastructures, non-urban areas must be accounted for.

#### ... R10. Make sure that the new technologies answer to a true need

ICT utilization depends on integrated policy and communication, and the evolution of ICT-related procurements should be followed through a long-term contract.

... An integrated view of a Smart City. ....

## • The Know-How

Survey, Debate and Dissemination

### Project-UE Opinion study: Sustainability and Efficient use of Resources

INITIATIVE:

O CIEJD enquanto Organismo Intermediário no quadro da Parceria de Gestão estabelecida entre o Governo Português e a Comissão Europeia, através da sua Representação em Portugal.

DESIGN AND DEVELOPMENT:

The "EU Project - Sustainability & Efficient Use of Resources: [Survey, Debate and Dissemination](#)", is a project designed and developed by the Faculty of Sciences, University of Lisbon (FCUL), with CITIDEP and ICS-UL.

It is a European Commission initiative, promoted by the European Information Centre Jacques Delors (CIEJD), General Directory for European Affairs - Ministry of Foreign Affairs, responsible for the Information and Communication about the European Union in Portugal.

The opinion study is based on an anonymous and confidential survey by on-line questionnaire.

- (Re)industrialization, Sustainable Development, and the Green Economy;
- Europe 2020 and sustainable growth for efficient economic use of resources and energy sustainability;
- The importance of education for the ocean.

The e-Planning Lab is at the core of the FC-UL and CITIDEP Project Team

The project includes 6 national debates in several cities in Portugal, with webcast and other forms of citizen participation.

## • The Know-How

e-Planning Team works on new frameworks for intellectual property on ICT innovation

### Project "ICT challenges to property"

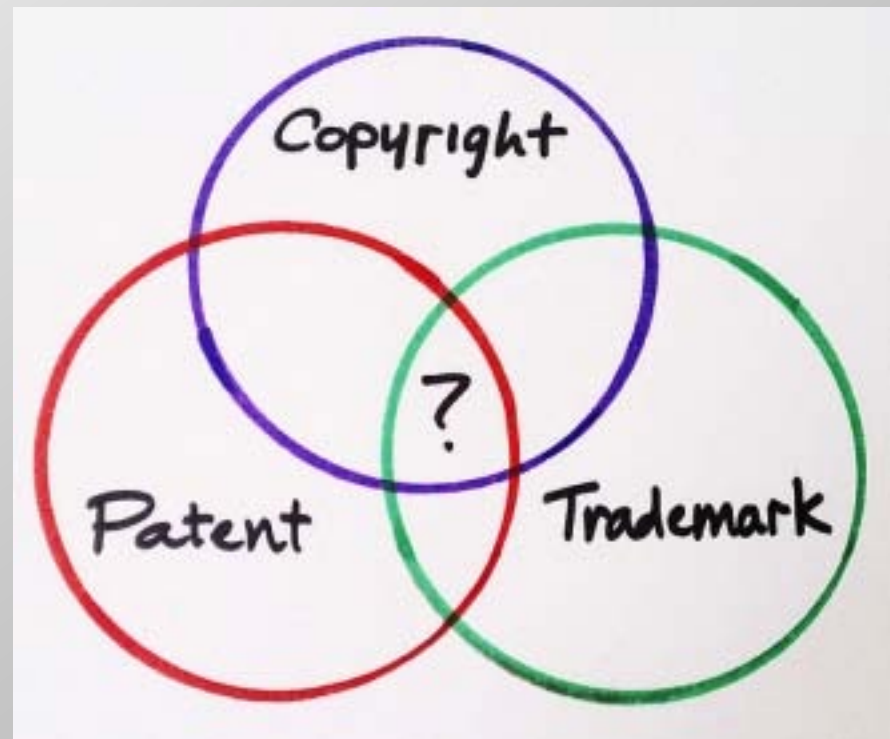

Innovation & intellectual property dilemma

Intellectual property refers to the set of instruments for protection of intellectual creations. Patents are one of the instruments and perhaps the best known, but there are other ways to protect creations of the mind.

Exploring all instruments of protection and establishing protection strategies is an area of growing interest, alongside with, and in the context of, the development of e-cities and virtual society.

To join intellectual property with innovation and measuring innovation through the European innovation indicators is a matter of utmost importance, especially since the allocation of funding in Europe is now dependent on innovation performance.

As a target for this line of research, we are aiming for the development of a new innovation indicator.

Problem: complexity on the integration of  
sustainable practices in the urban context.

Idea: web site to integrate / share knowledge on  
urban farm/gardens, mediating expert knowledge  
and practical experience of citizens and  
communities.

Research Questions:

- Can these sites
- increase the number of participants in these initiatives?
  - increase the number urban farm / gardens?
  - improve the quality of the product?
  - prolong the lifetime of each initiative?

**O e-Planning no apoio aos Terapeutas de Referência**

O projecto - **Terapeutas de Referência** - encontra-se na fase inicial, está a ser conduzido pelo Serviço de Psiquiatria e Saúde Mental do Hospital de Santa Maria, Centro Hospitalar de Lisboa Norte, abrange uma área geodemográfica de 350.000 habitantes, na qual se inserem várias centenas de pessoas com doenças mentais, a maioria das quais, sem apoio familiar e sem qualquer apoio comunitário.

Faço ao elevado número de internamentos de repetição, provocados por má adesão terapêutica, fraco suporte familiar e/ou comunitário e ruptura na continuidade de cuidados (quer entre os cuidados de saúde e outras estruturas de reabilitação ou reinsertão), foi criado o projecto terapeutas de referência.

Os objectivos fundamentais consistem em assegurar os cuidados necessários de forma coordenada e efectiva em colaboração com o médico assistente e a pessoa com doença, visando:

Installed Capacity of Electric Generation (MW) - Renewables (2011)

Installed Capacity of Electric Generation (Mw) - new renewable sources in Brazil

Few R&D resources used to the clean energy projects, especially considering the potential of Brazil. The amount has increased in the last years.

Focus: in energy efficiency and hybrid vehicles.

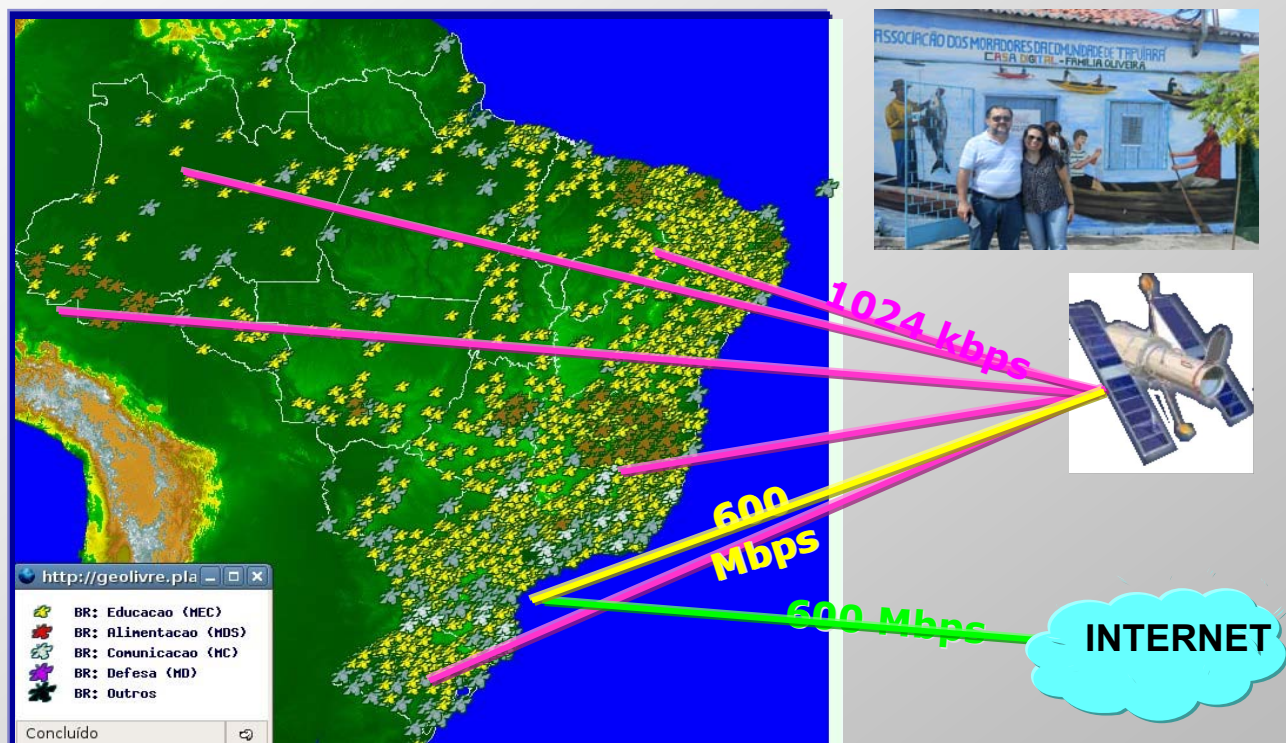

Improve: Concept of Sustainable Development; Integration with other policies such as climate; Supply Chain issues; Behavior change.

## • The Know-How

e-Planning Team has experience using satellites for digital inclusion in rural areas

### Project “GESAC –Digital Inclusion” (Brasil)

Coordinated by e-Planning team members, this project originated:

- 13.000 acesses in broad band (12.000 via satellite) for Digital Inclusion in "Telecentros" and rural schools.
- Data Center with applications and services.
- Services for training and "capacity building" for the development of digital skills competences in the target communities, to optimize use and benefit of the new ICT.

## • The Know-How

e-Planning Team has experience using satellites for digital inclusion in rural areas

### Project "Digital Territories" (Brasil)

The Digital Territories project installed “digital homes” in rural communities. Using satellite was key to provide access.

Besides access to a new pool of resources and information, this allowed also sharing experiences with other rural communities, a major factor in sustainable development in the rural world.

#### Inclusão social a partir da inclusão digital

Melhorar as condições de vida da população rural com a ajuda da tecnologia: esse é o desafio do projeto Territórios Digitais, criado em 2008 pelo Ministério do Desenvolvimento Agrário (MDA).

## • The Know-How

e-Planning Team has experience researching satellite program impacts in rural areas

### Research "Factors of sustainability of Digital Territories" (Brasil)

**TERRITÓRIOS  
DIGITAIS**

Given the huge impact of the Ceará (Brasil) project "Territórios Digitais", it is important to study which are the factors of sustainability, identifying determinants of successes and failures in the experience of rural communities, with the support of local and state institutions, using a research-and-action methodology.

## • The Know-How

e-Planning Team has experience with new satellite generation and potential impacts

### Project “Use of new Ka band satellites for Digital Inclusion within CPLP space”

The new generation of Ka-band satellites (*High Throughput Satellite*), present a capacity many times superior to the one available in traditional satellites (C and Ku band). With the new technology, data links will have much greater capacity at a lower price compared to current available satellite data services. The reach of the new band can be amplified combining with wireless connections (Wi-Fi) as well with smaller cells from mobile telephones, bringing internet access and mobile applications to the most remote communities withing the CPLP (portuguese speaking countries) community, and enabling new economic and civic activities and initiatives.

### Project “e-citizenship: e-literacy with schools & municipalities” e-literacy workshop

The sustainable socio-economic development of a country requires a set of skills which enables citizens to act in their community. For this to happen, it is necessary to promote literacy in its various forms.

In educational contexts, it is urgent to promote digital literacy in order to provide young people with the ability to share, to compete and to produce. Thus, abandoning the paradigm of passivity towards the technology that surrounds us.

The e-literacy workshop develops strategies resorting to digital resources which are considered crucial for the development of ICT education.

## • The Know-How

e-Planning Team has experience with ICT to mediate cultural inclusion

### Project “Culturless”

Online Platform :

- Feedback forum for the beneficiary
- Best practice sharing forum
- Advertisement tickets for shows, exhibitions, etc;
- Dissemination of theater, dance, music and fine arts workshops;
- Messaging service available for booking activities;
- Mediation services for transportation, meals and lodging for conducting available activities;
- Chat room with video calling for communication and collaboration between different actors.

### ICT to mitigate the Cultural Divide

The screenshot shows the 'Cultureless' website interface. At the top, there's a header with the project logo 'Logótipo do projecto' and the title 'Cultureless' in red. Navigation tabs include 'Missão', 'Serviço', 'Registo', and 'Contactos'. A 'Mapa do site' icon is also present. Below the header, there's a 'Login' section with four buttons labeled 'J', 'A', 'IP', and 'ID'. The main content area features a vertical menu on the left with icons and labels for 'Dança', 'Teatro', 'Música', 'Cinema', and 'Outros'. The central part displays a list of activities: '•A Bela Adormecida' and '•O lago dos cisnes'. To the right, there's a section titled 'Ficha do espectáculo: - sinopse' with sub-sections for '- datas', '- horários', and '-Local (Aqui deve ser embebido o google maps com o ponto de referência da instituição de oferta)'. Below this is a map showing a city street grid with a red pin. A 'Reservar' button is located below the map. At the bottom, there's a footer with various logos including 'CAIS', 'ALDEIAS EM CONVERSÃO RURAL', 'CCB', 'CMA', 'Videovest', and 'BURRA'. A counter shows 'Número de visitantes 045741'. On the far right, there are three buttons labeled 'Empresa A', 'Empresa B', and 'Empresa C'.

With institucional CPLP support

**1) - Map the Installed ICT capacity**

*(ICT Infraestructure, Institutional & Regulatory Frameworks, Qualification, etc.)*

**2) - Identify good practices and lessons learned**

**3) - Identify special opportunities for better investment returns on inclusion, Cohesion and Sustainable Development**

e-Planning Consortium

[www.e-planning.org](http://www.e-planning.org)

## • The Know-How

e-Planning Team has experience working with human rights international networks

### Research “ICT and Human Rigths” -

The conference “Universal Jurisdiction of Human Rights” counted with the participation of the LabTec TS Team

Students from European Union Countries show their concern about peace and human rights in Budapest, Hungary

International Humanitarian Law Course in the International Institute of Humanitarian Law, San Remo, Italy

### Social networks HR - digital gap

## • The Know-How

e-Planning Team / PhD students:  
some on-going thesis research

• Creative partnerships – way to encourage intersectoral cooperation with technology.	•Agata Olbrycht
• Promoting Local Sustainability through Indicator-based awards: The case of ECO XXI Program	•Ana Isabel Moiteiro
• Patterns of intellectual property protection and economic development.	•Ana Isabel Neves
• Challenges to ICT regulatory framework: How the Moore Law and market failures facilitate software inefficiency.	•António Fernandes
• e-Prevention: drug prevention and education among young people through ICT.	•Catarina Nascimento
• Between urban and virtual walls: the influence of ICTs on divided cities. The case of Belfast.	•Francesca Savoldi
• New ICT in Portuguese speaking countries: Advantages from and for CPLP (Community of Portuguese-language Countries).	•José Manuel Moreira
• Compromise between free technology and privacy: a matter of technological literacy.	•Luís Reis Mata
• The impact of digital asymmetries in territorial cohesion: a new dimension of spatial planning.	•Marta Rocha
• Decision Support Tools in the Evaluation of Housing Market	•Paulo Batista
• Urban management models and data interpretation. Influence of data on the accuracy of usage profiles and territorial resources.	•Paulo Oliveira
• DDOS attacks and the new security framework challenges of the Era of “Hacking”.	•Pedro Graça
• Sustainability factors in Digital Inclusion: the case of Digital Territories Project in Brasil	•Rossana Moura
• e-Literacy, schools & municipalities towards a common goal: e-citizenship.	•Tania Fonseca

## • The Know-How

e-Planning Lab is open to faculty teaching  
doctoral and master e-Planning courses

PhD Program (FC-UL / FA-UL / FCT-UNL / UA)      Pos-Graduation (UL - F. Architecture)

Key Courses at  
the joint PhD  
& Pos-grad  
Program on  
e-Planning

Coordination:

Pedro Ferraz de Abreu  
Prof. Catedrático Conv.

ULisboa / CITIDEP

ULisboa / CITIDEP

Foundations of e-Planning

e-Planning Live Laboratory

# e-Planning agenda

**Joint PhD Program** UA+UNL+[UL+UTL] (since 2008)

e-Planning scientific domains	Summary of key objectives
<b>e-Planning knowledge infrastructure</b> (e- infrastructure)	<i>Mapping of the knowledge society. Mapping of the planning knowledge. Develop the new ICT infrastructures and strategic frameworks</i>
<b>e-Planning for the government of the future</b> (e-government)	<i>More efficient and responsive government, closer to citizens; better enabling role; better services; better adjustment to the challenge and new potential of digital implementation of administrative procedures, beyond raw automation; two-way G2G, G2C, G2B.</i>
<b>e-Planning for a new governance</b> (e-governance)	<i>Foster institutional culture towards the common good, more equity and less exclusion; build strategic institutional capacity within globalized world; better institutions; better regulation framework and handling of market failures, aware of the new ICT context; better balance of security &amp; efficiency vs. freedoms, liberty and accountability.</i>
<b>e-Planning for the city of the future</b> (e-city) and territory	<i>Build the cities of the future, as sustainable environments with new functionality that breed innovation; foster cities with better quality of life, more attractive and competitive; better spatial planning, promoting social and territorial cohesion, incorporating new structural impacts of ICTs.</i>
<b>e-Planning for a new citizenship</b> (e-citizenship)	<i>Enable a better informed and educated citizen, more participative, more critical, more responsible; better balance of technology challenges with ethics &amp; individual freedoms &amp; privacy.</i>
